TUTORIAL HOSTING

1. Langkah awal dalam pembuatan hosting, Sign in pada aplikasi Github di website.

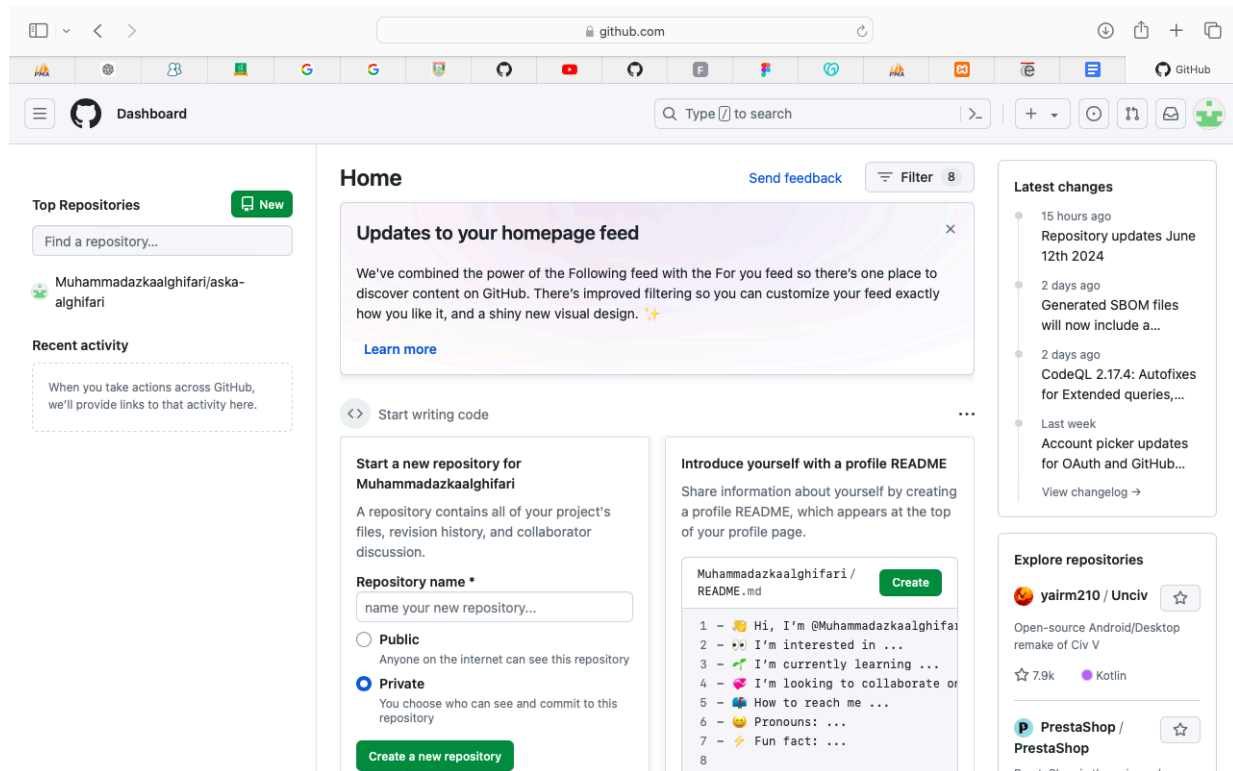

The image shows a web browser window with the URL `github.com`. The page displays the GitHub logo and the heading "Sign in to GitHub". Below this, there is a sign-in form with the following fields and options:

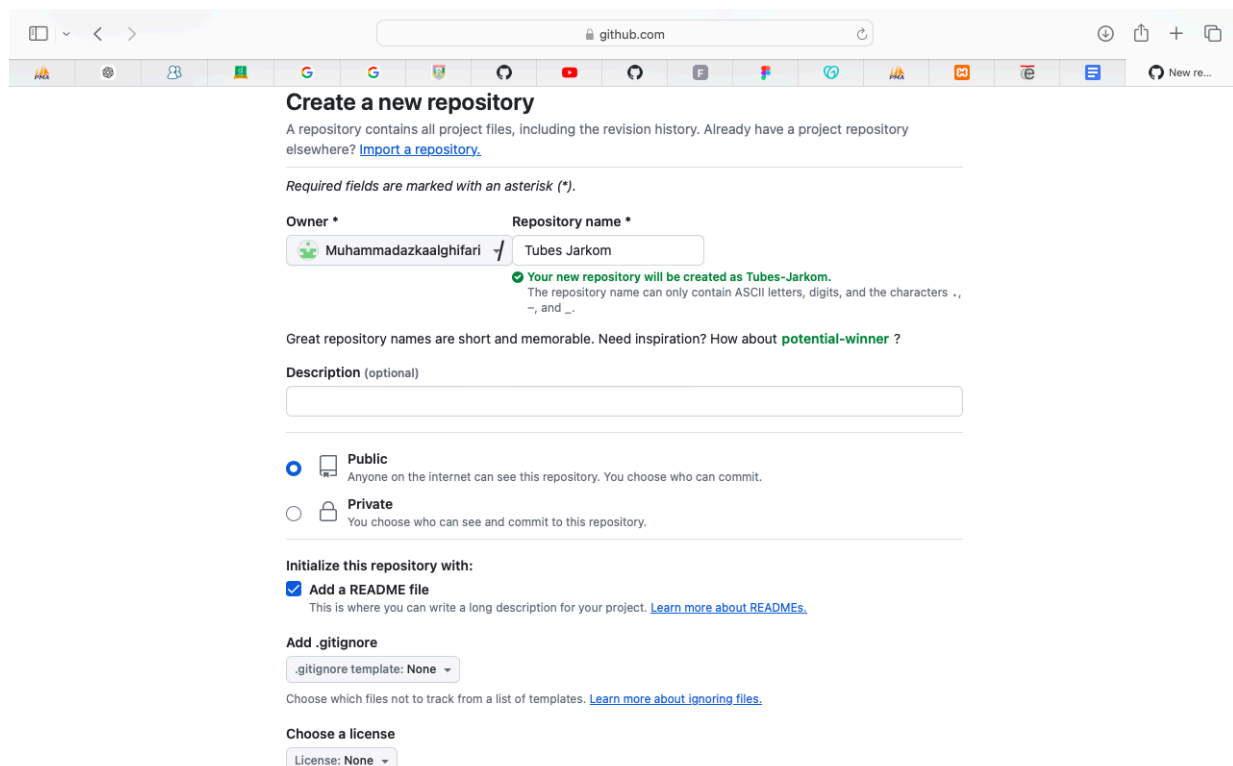

- Username or email address:** A text input field containing the email address `ghifariazka541@gmail.com`.
- Password:** A password input field with a blue border and a key icon on the right. The password is masked with dots.
- Forgot password?:** A blue link next to the password field.
- Sign in:** A green button below the password field.
- Sign in with a passkey:** A blue link below the "Sign in" button.
- New to GitHub? Create an account:** A blue link below the "Sign in with a passkey" link.

At the bottom of the page, there is a footer with the following links: [Terms](#), [Privacy](#), [Docs](#), [Contact GitHub Support](#), [Manage cookies](#), and [Do not share my personal information](#).

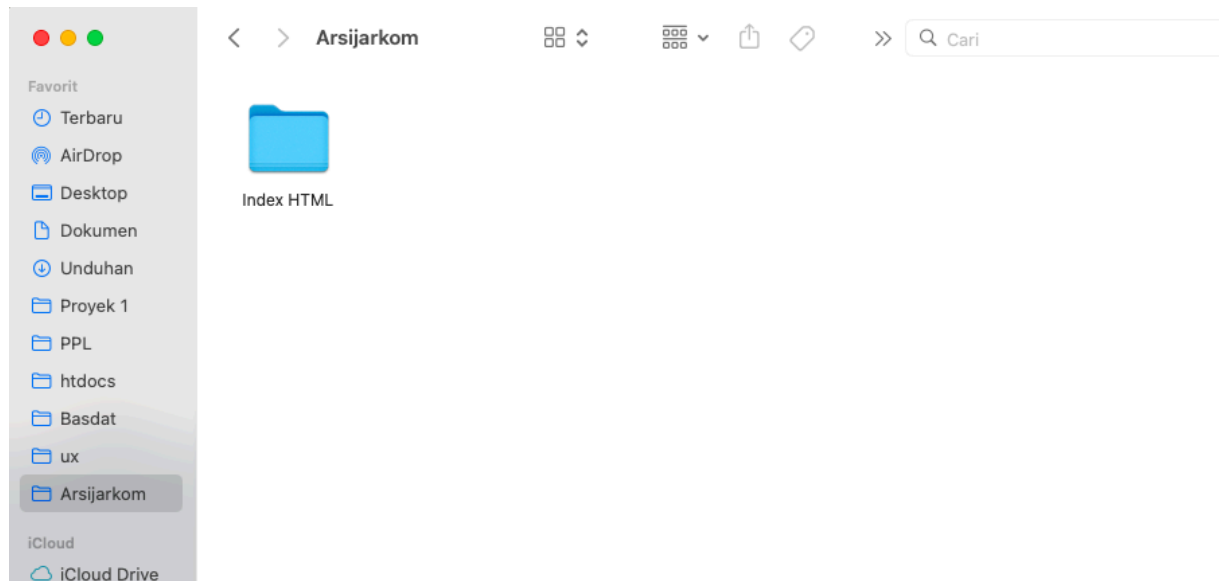

2. Klik "New" pada bagian pojok kiri atas untuk membuat repository baru

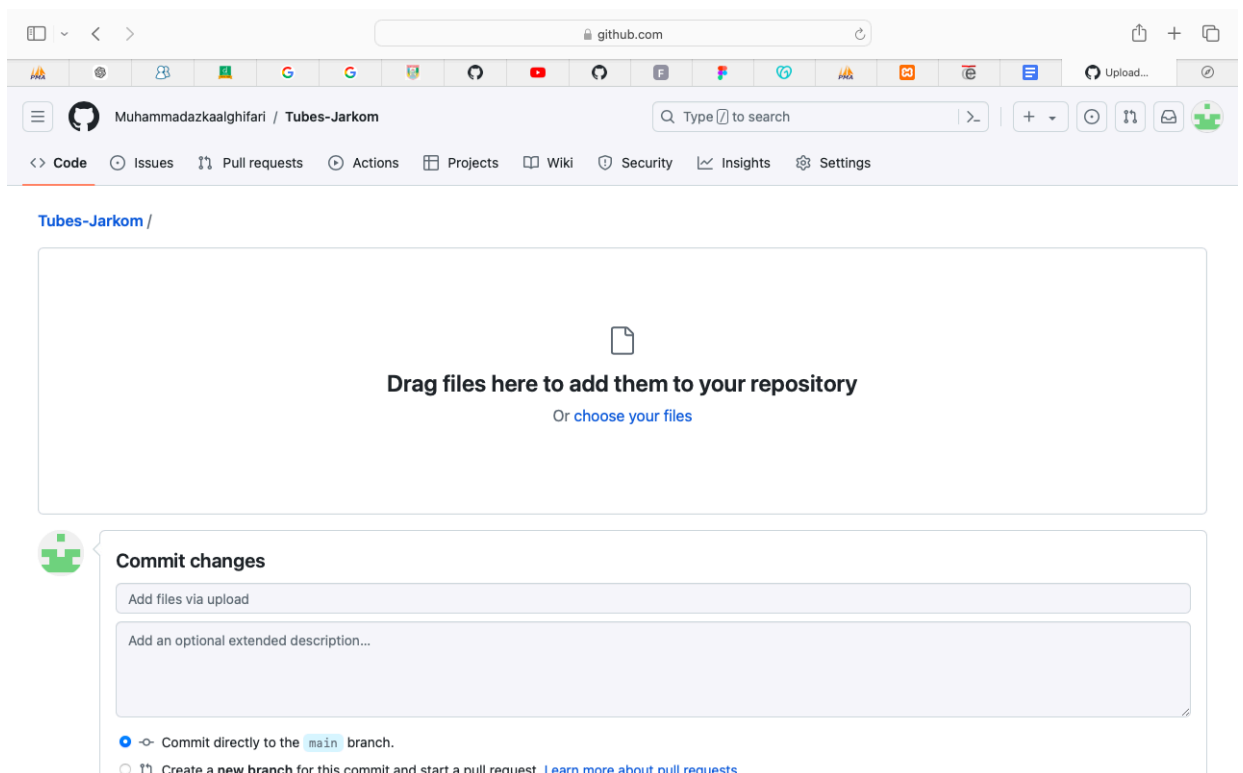

3. Berikutnya, ke bagian bawah klik "Create Repository"

4. Langkah berikutnya buat folder khusus di dokumen dengan nama folder "index.html"

5. Lalu kembali lagi ke Github, masukkan file index.html dengan cara drag files.

6. Kemudian tunggu hingga proses upload selesai lalu klik commit changes.
